

## Photo Upload Guidelines for Quote Requests

Please follow these guidelines when uploading your pictures. This will help our NeoGraft consultant prepare an accurate hair restoration plan and quote.

- Take photos in a room with bright, natural light; do not use flash
- Take pictures from 3 - 5 feet away
- Use a light or neutral color wall as backdrop
- 5 separate views (4 for beards) are ideal

Front View

Front View: This view lets us see your existing hairline. Feel free to draw your desired hairline (or beard) shape onto your face to show us your goals.

Right View

Right View: This view helps us see the extent of your hair loss (or patchy beard). Please make sure you take picture directly from the side at eye level.

Left View

Left View: This view helps us see the extent of your hair loss (or patchy beard). Please make sure you take picture directly from the side at eye level.

Back View

Back View: The back of the head is where your donor hair will be extracted. This view helps us see the density of your donor hair.

Tilt View

Tilt View (*not needed for beard*): This view from the top helps us determine the extent of your hair loss including possible future hair loss.
